

BEST PRACTICES.

Working in high-traffic areas carries inherent risks. Make sure your crew has everything they need to be safe out on the road. To help you identify and address areas of need, we've compiled this checklist of best practices, safety regulations and recommended products to ensure everyone makes it home at the end of their shift.

	Product	Standard or Regulation	Qty.	Sources	Rec. Products
	Traffic Cones	For high-speed roads or nighttime use, cones must be at least 28 inches tall and must have two white reflective collars (one 6-inch and one 4-inch).	4-5	MUTCD 11th Edition, Section 6F.64 Zip's blog on Understanding the Basics: Cone Types, Sizes and Colors	SHOP
	Warning Signals	If a commercial vehicle stops on a highway or shoulder, the driver must place warning devices within 10 minutes: One at the traffic side (10 ft), one at 100 ft toward traffic, and one at 100 ft away from traffic.	3	ecfr.org 49 CFR § 392.22 & 49 CFR § 393.95(f)	SHOP Triangles SHOP Flares
	Fire Extinguishers	Keep one in-cab and one in the rear tool box for immediate access to vehicle or cargo fires.	2	ecfr.org 49 CFR § 393.95(a)	SHOP
	First Aid Kits	OSHA requires "adequate" first aid, but refers to the ANSI/ISEA standard for what constitutes a compliant kit. Class B kits are the professional recommendation.	=	Department of Labor Medical and First Aid Standards	SHOP
	Hi-Vis Apparel	Various rules depending on the roadway. ANSI Class 2 and 3 required based on type of highway and speed of traffic. ANSI Class 3 for 60+ MPH traffic. ANSI Class 2 for 25-50 MPH traffic.	-	Zip's Blog on ANSI Standards	SHOP
	Spill Kits	This section sets out requirements for the prevention and containment of oil spills during transportation. Operators are expected to have the personnel or equipment to respond to a discharge in the "shortest practicable time.	-	ecfr.org 49 CFR Part 130 Zip's Blog on Spill Kits and Products	SHOP

Stay safe and compliant by outfitting your truck with the necessary gear
